FOR IMMEDIATE RELEASE

Fugro-Jason Announces Tom Taylor as North American Region Manager

Houston, January 29, 2008 – Fugro-Jason (www.fugro-jason.com) announced today the appointment of Tom Taylor as Region Manager for North America. In this role Taylor will be responsible for managing sales and operations in the United States, Canada, and Mexico. He will oversee the Company's revenue growth and customer satisfaction throughout the region. Fugro-Jason is a leader in reservoir characterization technology for the oil and gas industry.

"We are very excited to have Taylor join our team," said Eric Adams, Managing Director of Fugro-Jason. "He brings with him a wealth of experience that will make him an asset to our organization."

Taylor brings to Fugro-Jason more than three decades of experience in the oil and gas industry. His broad range of experience includes field engineering, product management, and development of decision and forecast systems. His years in consulting give him the skills needed to understand and meet client requirements.

Taylor's past positions include Managing Partner of Palladian Analysis & Consulting, LLC, a firm specializing in supply chain management, market research, and product optimization. Taylor also served as Global Product Introduction Manager and Specialty Engineered Products Manager during his 15 years at Schlumberger and later Baker Atlas. Taylor has two BSC degrees in Electrical and Mechanical Engineering from Georgia Tech and an MBA from the University of Houston.

"Today's oil & gas operators need the improved exploration efficiency that Fugro-Jason technology provides. There are plenty of hydrocarbon reserves out there, but it will take the Fugro-Jason type of technology to economically find it," said Taylor. "I'm excited to join the team that is leading this dynamic market and look forward to the tremendous opportunity Fugro-Jason has going forward."

About Fugro-Jason

Fugro-Jason is dedicated to delivering innovative products and services to help our clients identify and produce hydrocarbon deposits by integrating information from the various geoscience disciplines. In 1993 Fugro-Jason introduced the Jason Geoscience Workbench, making it possible to integrate geological, geophysical, geostatistical, petrophysical and rock physics information into a single consistent model of the earth. In 2006, Fugro-Jason introduced the PowerBench, a Windows®-based system integrating Geology, Geophysics, Petrophysics, and Modeling. The application of Fugro-Jason's technology, either through use of the software or through our consultancy services, substantially improves returns on E&P investments by adding invaluable reservoir model information that reduces the risks, costs and cycle-times associated with field development.

Fugro-Jason is a unit of Fugro NV. Fugro was founded in 1962, and is listed on Euronext NV, Amsterdam, the Netherlands. Fugro has more than 10,000 staff and a permanent presence in over 54 countries.
