FOR IMMEDIATE RELEASE

Fugro-Jason Announces New Business Managers in Middle East

Houston, January 31, 2008 – Fugro-Jason (www.fugro-jason.com) announced today the appointment of Alistair Cunningham and Ashley Taylor as Business Managers in the Middle East. Cunningham will be responsible for project services and software sales in Saudi Arabia and Bahrain. Taylor will be responsible for project services and software sales in the Gulf States and Pakistan. Both will ensure on-time delivery of project services and oversee software sales, support and customer service. Fugro-Jason is a leader in reservoir characterization technology for the oil and gas industry.

"The Middle East is an important region for Fugro-Jason," said Eric Adams, Managing Director of Fugro-Jason. "Alistair Cunningham and Ashley Taylor both bring the experience needed to expand and improve the service to our clients in the region, particularly as we bring innovative new products into the marketplace."

Cunningham's past positions include postings in Bahrain, UAE, UK, and China for a number of oil and gas related businesses. He holds a Bachelor degree in Economics. Taylor's past positions include postings in Malaysia, UK and China in petroleum-related industries. He has a Master of Sciences in Petroleum Geoscience and a Bachelor of Science in Environmental Geoscience.

"Fugro-Jason's software tools will change how the industry achieves maximum sustainable reservoir production," said Cunningham. "I am thrilled to be part of the team working on the Arabian Gulf production targets, which are the biggest and most exciting challenge anywhere in the world."

"At a time of pervasive economic growth on the back of robust oil prices, it is exciting to be part of the team here in the Middle East," said Taylor. "It is great to be part of a company that can help oil and gas companies maximize returns while minimizing the risk when drilling."

About Fugro-Jason

Fugro-Jason is dedicated to delivering innovative products and services to help our clients identify and produce hydrocarbon deposits by integrating information from the various geoscience disciplines. In 1993 Fugro-Jason introduced the Jason Geoscience Workbench, making it possible to integrate geological, geophysical, geostatistical, petrophysical and rock physics information into a single consistent model of the earth. In 2006, Fugro-Jason introduced the PowerBench, a Windows®-based system integrating Geology, Geophysics, Petrophysics, and Modeling. The application of Fugro-Jason's technology, either through use of the software or through our consultancy services, substantially improves returns on E&P investments by adding invaluable reservoir model information that reduces the risks, costs and cycle-times associated with field development.

Fugro-Jason is a unit of Fugro NV. Fugro was founded in 1962, and is listed on Euronext NV, Amsterdam, the Netherlands. Fugro has more than 10,000 staff and a permanent presence in over 54 countries.
