FOR IMMEDIATE RELEASE

Fugro-Jason Releases PowerLog® 3.0 Petrophysics Software

Major New Version Tuned for Petrophysical Standards

January 22, 2009—Houston, Texas—Fugro-Jason (www.fugro-jason.com) today announced the immediate availability of [PowerLog® 3.0](#), a major new version of the well-known petrophysical interpretation software. PowerLog is the industry standard for Windows®-based petrophysical analysis, dedicated to log data editing, conditioning, analysis and presentation. PowerLog 3.0 works the way petrophysicists do—making standard operations faster and more intuitive. Fugro-Jason is a leader in [reservoir characterization technology](#) for the oil and gas industry.

Designed for use by anyone who needs to easily provide fast, quality well log interpretation, PowerLog is used every day by petrophysicists, geologists, reservoir engineers and others involved in oil field exploration, appraisal and development. PowerLog 3.0 features a new, robust data manager, enhanced interactivity between processes and new functionality while maintaining backward compatibility.

“PowerLog 3.0 retains all the ease-of-use and speed that current PowerLog customers expect, plus now supports rapid introduction of new capabilities,” said Brad Woods, Application Engineering Manager for Fugro-Jason. “The completely new software architecture makes it easy for us to respond to change requests and for users to add custom functionality.”

PowerLog 3.0 is available now. Contact Fugro-Jason for pricing and further details.

About Fugro-Jason

Fugro-Jason is dedicated to delivering innovative products and services to help our clients identify and produce hydrocarbon deposits by integrating information from the various geoscience disciplines. In 1993 Fugro-Jason introduced the Jason Geoscience Workbench, making it possible to integrate geological, geophysical, geostatistical, petrophysical and rock physics information into a single consistent model of the earth. PowerLog has been part of the Fugro-Jason technology suite since 2002. The application of Fugro-Jason’s technology, either through use of the software or through our consultancy services, substantially improves returns on E&P investments by adding invaluable reservoir model information that reduces the risks, costs and cycle-times associated with field development.

Fugro-Jason is a unit of [Fugro NV](#). Fugro was founded in 1962, and is listed on Euronext NV, Amsterdam, the Netherlands. Fugro has more than 13,500 staff and a permanent presence in over 50 countries.
