Fugro-Jason Expands Presence in South America

New office opens in Bogota, Colombia

February 16, 2010—Houston, Texas – Fugro-Jason, the leader in reservoir characterization technology, today announced the opening of a new office in Bogota, Colombia. This office will support on-going and future projects throughout the country. Fugro-Jason has been operating in South America for more than 10 years.

“By opening an office in Bogota we can work more closely with our clients in Colombia,” said Jesus Bilbao, South America Region Manager. “The business climate in Colombia is very strong right now.”

The office will support sales and project services throughout Colombia. The Fugro-Jason software suite includes the Jason Geoscience Workbench® (JGW), PowerLog® and EarthModel® FT. Together these products enable Seismic to Simulation studies that support reservoir evaluation, future production forecasts and alternative field management strategies. The reservoir consultancy group provides a full range of services, from reservoir characterization studies to full integrated seismic to simulation studies.

The new office details are as follows:

Fugro South America BV, Sucursal Colombia

Calle 98, # 8-28, Of. 402
Bogotá, Colombia
Tel. +57 (1) 743-3270 / 743-3271 / 743-3272
VoIP: +1 (832) 519-0164
Fax. +57 (1) 743-3273

Ms. Izaskun Azpirtxaga, Business Manager

About Fugro-Jason

Fugro-Jason is dedicated to delivering innovative products and services to help our clients identify and produce hydrocarbon deposits by integrating information from the various geoscience disciplines. Fugro-Jason applications make it possible to integrate geological, geophysical, geostatistical, petrophysical and rock physics information into a single consistent model of the earth. The application of Fugro-Jason’s technology, either through use of the software or through our consultancy services, substantially improves returns on E&P investments by adding invaluable reservoir model information that reduces the risks, costs and cycle-times associated with exploration, appraisal and field development and production.

[Fugro-Jason](#) is a unit of [Fugro NV](#). Fugro was founded in 1962, and is listed on Euronext NV, Amsterdam, the Netherlands. Fugro has more than 13,500 staff and a permanent presence in over 50 countries.
