Dear Erik:

We would like to take this opportunity to express, in writing, our appreciation for the inversion work your company did for us on our Argentinean 3D data sets.

Through the integrating of the inversion data set and our conventional interpretation we feel that a better understanding of the subtle complexities associated with the play types encountered in our Argentinean properties has been reached. No doubt, the ease and openness with John Pendrel every step of the way led to this satisfactory product.

We hope we can work together again in the future using our combined expertise to increase our overall success.

Thanks once again,

Yours truly,

A handwritten signature in black ink, appearing to read "Colin Mathiesen", with a long horizontal flourish extending to the right.
